

EDITORIAL

Since its creation in 2012, the Foundation has supported more than 50 projects on its favorite subjects: health, education, culture and environment. Thanks to these numerous contacts established and these partnerships concluded in France and abroad, the Foundation has gained in expertise, professionalism, and requirement as shown by for example the selection committee which At the same time, the Fund also wishes to chairs this year to the decisions of new partnerships for the period 2023/2024.

The anniversary year of our 10 years - which arrived just after the Covid health crisis that came to shake up some of our obvious facts - was also conducive to reflection on our historical engagement themes. We decided to focus for the future on a strong axis around the access to a healthy and sustainable food as well for humans and for the environment.

Access to quality, produced food in conditions respectful of the environment is a major issue in our societies.

Eat better, with awareness of the issues of tomorrow, reconnect with nature, review our eating behaviors are concepts that need to be better integrated in the light of economic and current climate changes but also taught to new generations. The programs on food education that we support in Marseille are moving in this direction.

Develop agricultural sectors, integrate principles of agroecology in cultural practices, help adapt to climate change, contribute to food security, are part of the programs we support in Africa in 2022/2023, with the main goal of strengthening the resilience of small operators.

I am very proud of the new direction that we take around this theme of sustainable food systems. We are surrounded with solid project leaders working to measurable impacts for the benefit of well identified beneficia-

continue or to strengthen 3 other axes of commitment. It supports initiatives aimed at the fight against poverty in Marseille, particularly via multi-company programs, it continues to promote artistic and cultural exchanges between Marseille and Africa, and finally it commits to select and support projects selected by company employees in order to develop a culture of commitment..

MARIE-PIERRE FABRE

President

IN ACTION **FOR 10 YEARS**

The Compagnie Fruitière created two hospitals in Africa. One in the Nyombé region in Cameroon, the other in Côte d'Ivoire, in the Bodo region. Access to quality care is a concern that has prefigured the action of the Compagnie Fruitière Foundation.

The first partnerships aimed at supporting NGOs or associations acting in health: Humaniterra, Santé Sud, Ordre de Malte, ...

Since 2016, the action of our fund has increased thanks to the implementation of numerous partnerships. More than 50 associations were supported.

The objective of our fund is to establish lasting links with associations but also to support collective projects bringing together patrons for more impact.

La Provence

By Jean-Luc CROZEL, in la Provence 22.11.2022

EN ROUTE TO A NEW MISSION IN 2022

A new strategy around sustainable food has been decided by the Board of Directors of the Compagnie Fruitière Foundation.

This involves narrowing the areas of intervention of the Fund in order to have more impact, and more readability too. The concern of a sustainable food for all also echoes the activity of the Compagnie Fruitière Group, keen to provide consumers with healthy and sustainably produced fruits.

OUR NEW STRATEGY IS ARTICULATED AROUND 3 AXES.

SCOPE

The Fund primarily supports programs in Africa (Cameroon, Ivory Coast, Ghana and Senegal) and in Marseille.

The adoption of our new strategy was accompanied by the strengthening of our selection process, with better criteria defined, the support of external expertise, and the involvement of employees of Compagnie Fruitière Group.

AXIS 1 HUMAN HEALTH & FOOD SAFETY

The Foundation supports organizations who aim to:

- Improve the health of all by promoting access to diversified and quality products.
- Contribute to the availability of quality food in terms of nutrition and health.
- Support prevention actions, screening measures, awareness-raising activities as well as the care for populations suffering from hunger, food insecurity and malnutrition
- Promote consistent and sufficient access to water for domestic and agricultural use.

AXIS 2 FOOD EDUCATION

The Fund supports initiatives that aim to:

- · Educate children about proper nutrition and nealthy eating habits from an early age.
- Raise awareness on how food choices affected health and the environment.
- Pass on values of cooking and sharing a meal with others.
- Promote exchanges around the different culinary traditions.
- Create or recreate a connection to nature.

AXIS 3 AGRICULTURAL ENTREPRENEURSHIP & BIODIVERSITY

The Foundation supports organizations and NGO's developing programs in Africa to:

- Support the development of sustainable agricultural practices on family <u>farms</u>.
- Promote entrepreneurship and the implementation of income-generating activities towards economic and food empowerment.
- Promote any form of sustainable agriculture and adapting to climate change.

OVERVIEW OF PROJECTS **SUPPORTED IN 2022**

AGRISUD

Multi-year support for strengthening family subsistence farming and local attiéké (cassava) sector for the benefit of 3 villages in the Autonomous District of Abidjan, in Ivory Coast.

- 100 very small family farms will be able to improve their agro-environmental and socio-economic performances.
- **60** artisanal processing units of attiéké (160 women) and 1 semi-industrial production unit of attiéké (**30** women) will be able to improve their profitability and sustainability.

ENTREPRENEURS DU MONDE

u Monde

Support to a reinforcement program of the capacity and resilience of small producers of Matam (Senegal) through training to intensive production techniques and environmentally friendly.

- 1,600 small, vulnerable women producers, members of 4 separate groups, are trained to agroecological techniques that allow better resilience to climatic upheavals and hence strengthen their food security.
- keting of their production and get access to equipment to facilitate their work.
- They will be able to transform and promote their agricultural production in complete autonomy thanks to the provision of a solar transformation unit for cereals.

CFSI

Support to a project jointly implemented by the National Council consultation and cooperation of rural areas (CNCR), the GRDR Migration - Citizenship -Development and Agronomists and Vets without borders (AVSF) in the peripheral districts of Dakar and Vélingara in

- 15 primary schools are supplied with quality local products for the benefit of 1.500 families.
- They are also accompanied in the mar- Access to breakfast for children aged 6 to 12 who were suffering vitamin and mineral deficiencies.
 - 10 cereals, farmers and milkmaids organizations who were struggling to find stable and remunerative commercial outlets are supported in order to establish supply partnerships with these canteens.

The Compagnie Fruitière Foundation supports the local branch development in Marseille of the association that was launched in 2021 with the aim of:

• introducing food education, from field to fork, in the Provence and Marseille schools.

L'ÉCOLE COMESTIBLE PROVENCE

• offering educational workshop courses, in a fun, ecological and tasty way.

The objective is to offer **6** workshops of education for ten primary school classes in the northern districts of Marseille, so around 250 children.

HEKO FARM

HEKO*

Sustainable Food workshops demonstrate that a local healthy diet, and environmentally friendly is possible in town, through a theoretical and practical teaching, some market gardening (recognition and choice of seasonal edible plants) together with some preparations of simple and delicious dishes.

The Fund supports the educational program that seeks to reach a large target audiences (schools, young people, adults, retirees, etc.) by diversifying awareness and training tools on agroecology and responsible food.

More than **700** people coming from **6** nearby socio-educational structures will benefit of this program.

ARMÉE DU SALUT

As part of the fight against unbalanced access to a varied and qualitative diet, and a desire to give back autonomy to people in situations of great precariousness, the Armée du Salut Marseille created a local program targeting people staying at the hotel.

As these hotels do not have kitchens, this project provides residents with kitchen and raw ingredients allowing them to prepare themselves their meal, in particular thanks to a mobile kitchen in a

With around ten workshops per week, nearly **80** people benefit of this local

OUR ORGANIZATION

GOVERNANCE

The governance of the Compagnie Fruitière Foundation is structured around two decision-making bodies: the Board of Directors and the Steering Committee.

▶ BOARD OF DIRECTORS

Chaired by Marie-Pierre Fabre, President of the The Steering Committee analyses and selects the Compagnie Fruitière Foundation, the Board defines projects submitted by associations or organizations the orientations and major operating principles of of general interest, ensures their adequacy with the the fund and guarantees its good management and 3 areas of intervention of the fund and the alloits areas of intervention. He also supervises the cated resources of the Foundation. The Steering main partnerships and approves the budget. Board Committee is composed of internal members of the of directors of the fund is made up of 3 members.
